

HISENKO

HISENKO  
TOP IDEAS FOR LIFE

# COMPANY About us INTRODUCTION

ZHEJIANG HISENKO HVAC CO.,LTD. located in TAIZHOU, a famous Economic City, Who is a professional manufacturer.

Now our products including brass ball valve,brass fitting, temperature control valve, radiator accessories as well as heating instruments ect. which export to many market, Included Europe, America, Africa, Aisa and Middle East ect.

After more then ten years development,we have completely followed its program.has rich technical power, superior processing equipment ,advanced production technic, high precision testing means and perfect management.On the basis of " Quality First,Service Foremost,price best." In order to develop high-quality products, we establish a strong R&D team, and technical stuff near 20 , we hope to find the agent in most country and establish the global sales channels, which enable Hisenko's products very famous in the world, as the OEM factory,though we have ourself brand LD and HS, we also can supply many kinds products to our partner with their brand and their design.

We are not the biggest factory but skilled workers and technicians are engaged with us to produce the best quality of all products according to the International standardization ISO9001 and CE Mark.

Our trademark is "100% Customer Satisfaction". At present many foreign traders have contracted us as manufacturer and our products are distributed worldwide. Our dedication to constantly improving quality is the best assurance to customers.

Now we are planning spread our distribution network further by opening more branches and find more agent in the world to closer to our clients. Welcome everyone who are interested in us.Give us a try! We believe we will stronger together.

## Introducing Hisenko HVAC Solutions - Pioneering Smart Control for Comfort and Efficiency

Welcome to Hisenko HVAC Solutions, a cutting-edge innovator and provider of intelligent control systems for heating, ventilation, air conditioning, and automation (HVAC) since 2018. At the core of our enterprise lies a profound dedication to enhancing the way buildings use and manage their environmental conditions through smart, integrated solutions.

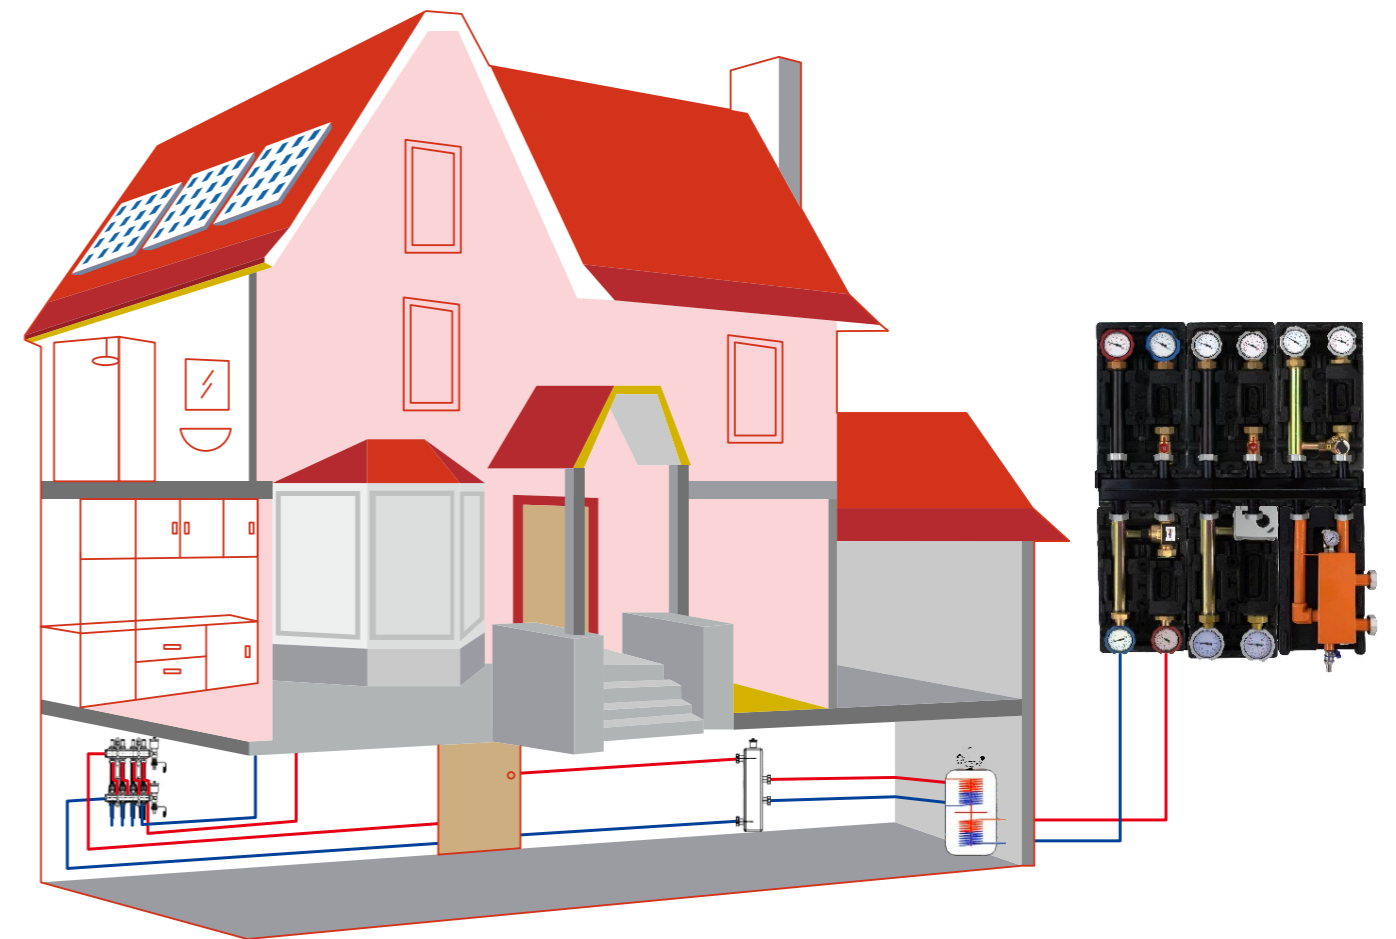

### Our Vision in Motion:

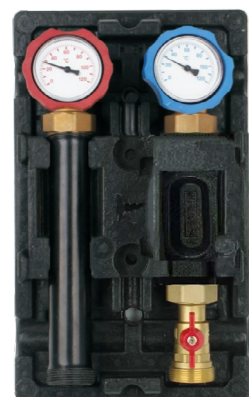

Hisenko HVAC Solutions has been architecting advanced intelligent control systems that merge the latest technology with user-friendly interfaces. Our mission is to optimize the performance of HVAC systems worldwide, resulting in energy savings, improved comfort, and enhanced air quality for both residential and commercial clients.

### Innovative Product Suite:

Our comprehensive range of intelligent control products features state-of-the-art technologies including:

1. Smart Thermostats: With autonomous learning capabilities, our smart thermostats adapt to your lifestyle, reducing energy consumption without compromising on comfort.
2. Building Management Systems (BMS): We offer tailored BMS solutions that allow facility managers to monitor and control every aspect of a building's HVAC operations from a single platform.
3. IoT Enabled Controllers: Our Internet of Things (IoT) enabled controllers provide real-time data analytics, enabling predictive maintenance and remote troubleshooting.
4. Sensors and Meters: Highly accurate sensors and meters form the backbone of our intelligent control systems, ensuring precise measurements and responsive adjustments.
5. Occupancy Detectors: Our occupancy detectors ensure HVAC systems operate efficiently based on actual occupancy rates, conserving energy when rooms are unoccupied.

**Dedication to Excellence:**

At Hisenko HVAC Solutions, we place a strong emphasis on quality and continuous improvement. Our stringent quality assurance protocols and adherence to global standards guarantee that each product we manufacture meets the highest industry benchmarks.

**Investing in Tomorrow's Technology:**

We pride ourselves on our research and development team that is consistently at the forefront of innovation. Their relentless pursuit of advancement has led to breakthroughs in AI-driven controls, wireless communication, and energy-efficient algorithms.

**Global Presence, Local Impact:**

With a far-reaching distribution network and partners across continents, Hisenko HVAC Solutions delivers its sophisticated systems to customers worldwide. Despite our expansive reach, we maintain a commitment to localized service, offering personalized support in multiple languages and time zones.

**Sustainability: Our Responsibility:**

We recognize our role in protecting the environment and have integrated sustainability into every facet of our operations. From eco-friendly offices to power-efficient products, our initiatives aim to minimize our carbon footprint while empowering our customers to do the same.

**Customer-Centricity at Its Best:**

For us, customer satisfaction isn't just a metric—it's a guiding principle. We listen to our customers' needs, engage with their feedback, and strive to deliver intelligent solutions that exceed expectations, simplify operations, and add value to their businesses.

**The Road Ahead:**

As we move forward, Hisenko HVAC Solutions remains steadfast in its quest to revolutionize the way buildings interact with their HVAC environments. Our pipeline is filled with groundbreaking projects like cloud-based management systems and voice-activated controls, setting new standards for intelligence and convenience.

At Hisenko HVAC Solutions, we are more than just creators of intelligent control systems—we are your partner in realizing efficient, comfortable, and smart living environments. Join us in unlocking the full potential of your HVAC systems.

**Features & Benefits**

Works as a dual filter to maximise the life expectancy of your whilst maintaining fuel efficiency

- Compact design for easy installation and maintenance
- Removes magnetic and non-magnetic particles
- Removes Iron, Nickel and Cobalt particles in the water
- 22&28mm compression fittings
- Glass filled reinforced plastic nylon
- Maximum working temperature 120 Deg C
- Maximum working pressure 5 bare
- Maximum flow rate 50 litre per min
- Rare neodymium 12,000 gauss magnet
- All the seals are high temperature EPDM sealse
- Saves energy by up to 6% per annum
- Provides consistent protection for the boiler system
- Extends the lifetime of the system
- Reduces carbon emissions
- Saves maintenance cost
